Forecast for Thursday 21 Jan 2021

Weather: A rather cloudy morning, with snow showers, heavy across western hills, but likely falling as rain to lowest levels below 300m. These easing gradually through the afternoon, with sunny spells following. Winds also easing a little, but temperatures falling and a freeze occurring overnight.

Chance of cloud free mountain/hill tops above 600m: 30% during the morning, increasing to 70% by the afternoon. Best chance in the east.

Visibility: Extensive cloud at 300m at first, lifting and breaking through the morning to 600m by the afternoon. Visibility on tops will be very poor, especially in showers with some spindrift possible. As winds ease and clouds break, some expansive views likely to develop into the afternoon, although still poor when any further showers move through.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early strong winds on highest tops soon easing. Full winter conditions expected at height, however, requiring appropriate equipment. Any showers could lead to some rapid deteriorations in conditions.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Thu 21 Jan 2021	45.2mm	84mm	100.8mm

Forecast for Friday 22 Jan 2021

Weather: Most hills dry, with sunny spells. A few scattered snow showers are possible, mainly across western hills and routes, although showers turn to rain and sleet below 400m. Feeling cold, despite lighter winds than Thursday.

Maximum wind: Westerly 10mph with gusts 20-25mph.

Chance of cloud free mountain/hill tops above 600m: 40% at first, but 80% in east.

Visibility: Cloud will obscure views above 600m at time, however this will become well broken by mid-morning to allow some wide ranging views.

Temperature: **Valleys:** Zero rising to plus 4 Celsius.
At 600m: Minus 1 Celsius.
Freezing level: 500m
